

"Alexa, dim the lights to 30%"

"Siri, close the garage door"

"Hey google, bathroom lights on"

Your lights, Your Switches, Made smart.

Fast & easy install

Great for retrofit & new builds

Voice Control

Works with

Google Assistant

Apple HomeKit

amazon alexa

Requires a Philips Hue Hub for Apple Home Kit, Google & Amazon or Alexa Echo 2 for Amazon only

The Stitchy range are small, easy to install devices that sit behind your light switches enabling voice control of your lights.

Offering unparalleled control from your conventional switch coupled with voice control from Alexa, HomeKit or Google home. Stitchy is easy to install, setup and turn any home into a voice-controlled powerhouse.

Running on Zigbee, Stitchy will work with thousands of other smart products in the market to bring efficiency and impressive automation into your life. These modules can control up to 200W of LED load (400W incandescent) and offers easy setup. For more information visit www.melec.com.au stitchy for all instructions, video's and specifications.
